

Hi! I'm

Aleksander Drwal

Web developer

Comp-sci student

education

Computer science

Warsaw Univeristy of Technology
2022 - now

Math/Physics

High School. I LO. Giżycko
2019 - 2022

About me

Short bio about me

I study 2nd year of computer science. In my free time and in between exams I code for fun, mostly in TypeScript. I like working in new projects with technologies I never used before and am always keen to learn new language/framework.

My skills

React

TypeScript

NodeJS

Express

Sequelize

Next.js

SQL

Tailwind

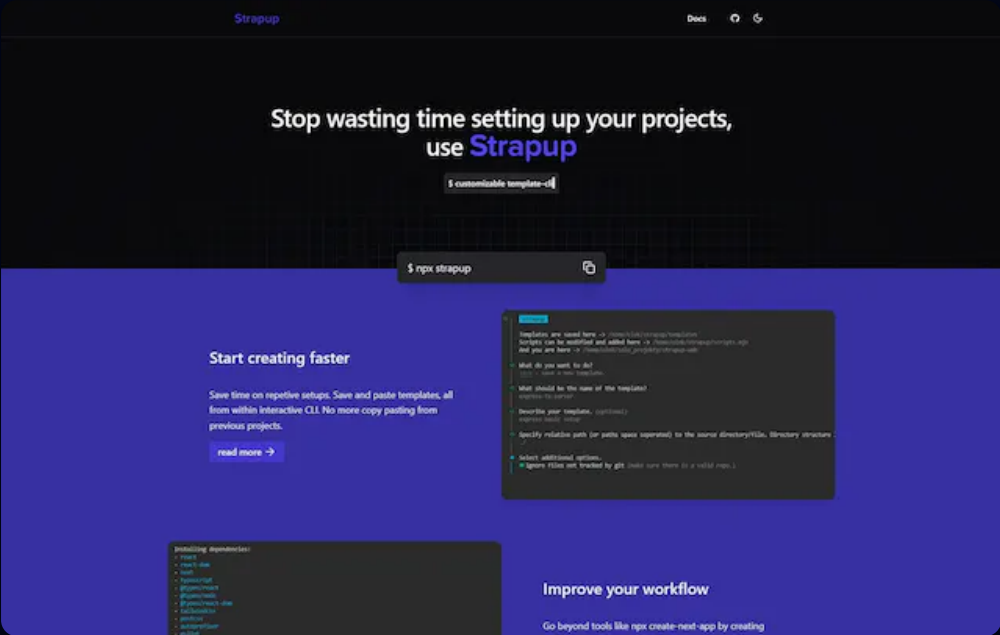

Python

C++

Recent projects

Strapup - a template CLI

React, TypeScript, Next.js, NodeJS, TailwindCSS, CLI

A project consisting of Strapup npm package - a CLI tool and a website for its documentation. It allows to quickly bootstrap any project by running custom scripts and pasting custom templates all from within interactive CLI.

Boss Monsters Tabletop

React, TypeScript, NodeJS, TailwindCSS, Socket.IO, Express

Recreation of Boss Monsters - a tabletop RPG, as a multiplayer game on the web. It's one of my older projects, which underwent few cycles of sudden gain and lost of interest in it. (thus TypeScript and Tailwind added half way through). I decided to include It here, as It shows my progress in terms of programming in general and the ability to use the knowledge acquired from other projects.
